Dear Hiring Manager,

I am writing to express my interest in the **Lead / Senior Flutter Developer** position within your organisation. With over **eight years of software development experience** and a track record of leading cross-platform projects from architecture to release, I am confident I can deliver immediate value to your team.

As Lead Flutter Developer & Tech Lead at **IKLIX (Dubai)**, I have owned the architecture and delivery of a complete e-commerce ecosystem — POS, delivery, dashboards and inventory — across mobile, web and desktop. I designed and maintained Python-based backend services and RESTful APIs, integrated payment gateways such as **Apple Pay** and **Stripe**, connected Odoo with the Klix application for sales operations, and continuously improved release stability, scalability and performance. Alongside hands-on engineering, I run code reviews, mentor developers and enforce engineering best practices.

Earlier roles at **Massar (Dubai)** and in Pakistan strengthened my foundations in native Android, NativeScript and hybrid development, including publishing apps to the App Store and Google Play and integrating native plugins, REST APIs and IoT components. I hold a **Bachelor of Software Engineering** from GC University Faisalabad.

What I bring to your team is a rare combination of **deep Flutter expertise, backend pragmatism in Python** and **technical leadership** — the ability to take a product from idea, to architecture, to a reliable production release while growing the engineers around me. I would welcome the opportunity to discuss how my experience can support your roadmap.

Thank you for considering my application. I look forward to hearing from you.

Sincerely,

Hafiz Qasim Ali
