Dear Hiring Manager,

I am writing to express my strong interest in a **Lead Flutter Developer** or **Senior Mobile Engineer** position within your organisation. With over **eight years of hands-on software development experience** — including four years leading cross-platform Flutter projects at IKLIX Dubai — I am confident that my technical depth and leadership background align closely with the demands of a senior engineering role.

At IKLIX, I architected and delivered an end-to-end Flutter ecosystem spanning mobile, web, and desktop platforms. My responsibilities extended well beyond writing code: I designed the overall system architecture, owned the full e-commerce stack (POS, delivery, inventory, and merchant dashboards), integrated payment gateways (Apple Pay and Stripe), and connected the platform with Odoo ERP. I also built and maintained the Python-based backend services and RESTful APIs that power these products, demonstrating my ability to contribute across the full stack.

Prior to IKLIX, I worked as a Technical Developer at Massar Dubai, where I developed and published iOS and Android applications using NativeScript, and earlier as an Android Developer in Pakistan, delivering native and hybrid apps with REST API integrations. This breadth of experience gives me a strong contextual understanding of how mobile products evolve across the full lifecycle.

I take particular pride in my approach to **team leadership and knowledge sharing**: conducting structured code reviews, mentoring junior developers, and establishing best practices that reduce technical debt and accelerate delivery. I believe great mobile products are built by empowered, well-guided teams, and I am eager to bring that mindset to your engineering culture.

I hold a **Bachelor of Software Engineering** from GC University Faisalabad and communicate fluently in English, Urdu, and Punjabi. I am available for immediate interview and can accommodate relocation or remote arrangements as required.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experience can contribute to your team's success. Please find my CV attached for your reference.

Yours sincerely,

Hafiz Qasim Ali
Lead Flutter Developer
